**1. ANNOUNCEMENTS FOR FOUR-SPHERE THEORY COROLLARIES FOR  
BIOCHEMISTRY**

Four-Sphere Theory will resolve protein folding problem completely and I have some code for doing this. Nature actually has a fourth purely electromagnetic spatial dimension which is physically real. For living tissue, there are today unknown features of electromagnetic activity in this extra dimension along with that which we have modeled in extant three-dimensional chemistry that I hypothesize to be essential for biochemistry. These will be discovered experimentally and are important part of actual life in Nature. I won't go into theoretical details [?].

What we know today about chemistry and biology are not a full description of biochemistry; they are rough ideas relying on three-dimensional chemistry.

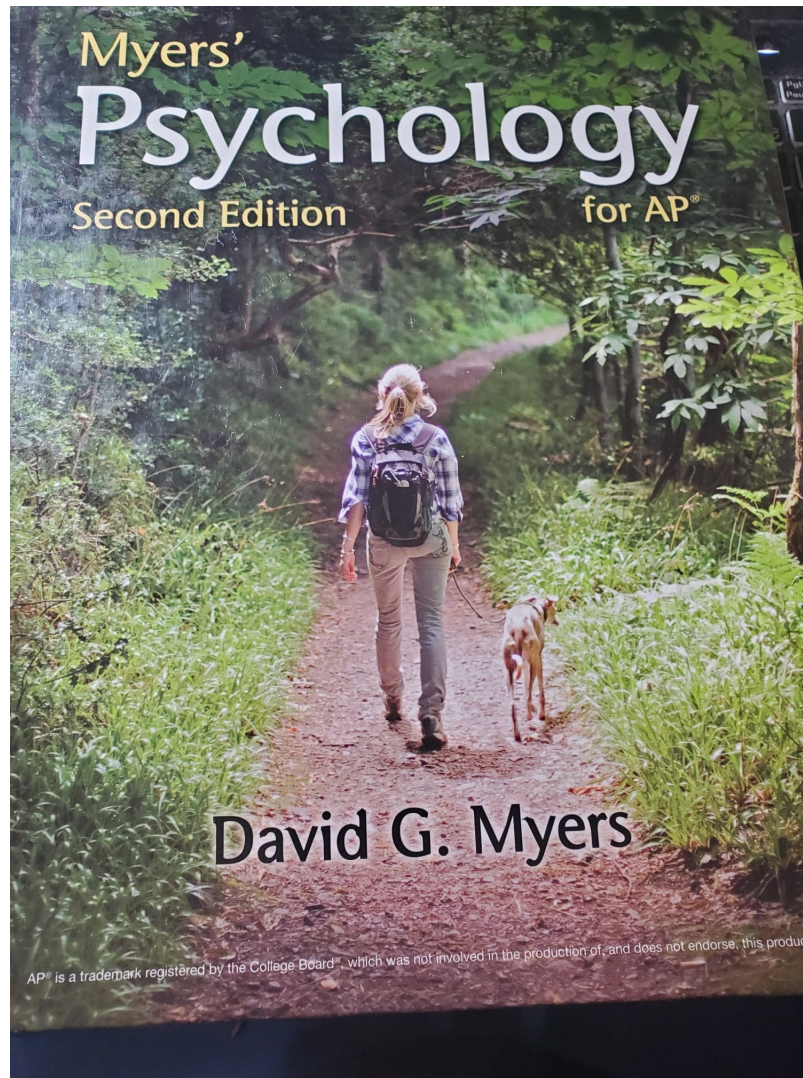

Just as the phrenologists of the nineteenth centuries were seeking to map character traits to bumps in the head, we are doing the same today in cognitive neuroscience still. This will be crystal clear once four-sphere theory is established and thoroughly tested. There is more to life than the primitive three-dimensional chemical descriptions, regardless of how sharp and precise they seem to us today.

I won't go into detail here but will return to this later. At the moment I am working through a book for high school AP Psychology, especially the biological bases of psychology, nervous and endocrine systems. All parts of this sort of neuroscience will have significant changes in the future as we have sharper grasp of how S4 Electromagnetism behaves. I agree with Jung that the Psyche is not just epiphenomenon.

AP Psychology is valuable for me because it represents summary of extremely well-established theories that have broad consensus as it allows me to put the implications of my four-sphere theory in context with consensus view suitable enough for AP high school students.

**2. ADVICE FOR PHYSICISTS**

I implore all physicists with adventurous and curious spirits to get a copy of Myer's Psychology used a few editions earlier like this.

This is a reasonable comprehensive treatment of psychology at an elementary level that you will be able to absorb holistically with some months of effort. Then I would request efforts at understanding how the S4 Electromagnetic Law (the interacting wave equation on spinor fields of  $S^4(R)$  with  $R = 3075.69Mpc$ ) also known as Ahmed-d'Alembert Law, the only long range force of nature in Four-Sphere Theory, provides a new understanding of living tissue, especially how it differs from Maxwell EM in  $\mathbf{R}^3$ . Then I want a merge of Psychology as a Universal Natural Science of Man with Four-Sphere Theory.

You see, Carl Gustav Jung was right and Psyche is not epiphenomenon of the brain. There is more to the Psyche and this will involve undetected phenomena involving the fourth purely electromagnetic spatial dimension. I will give you my word that you will not be disappointed; there are new discoveries of nature in this direction.

Unfortunately the war criminal Bill Gates, who has always harmed non-white people from youth, has cut into my Deep Interior and harmed and destroyed my life from which I might never recover with War Crimes. I must therefore seek your entry into these issues of unity of Life and Physics directly.

There ought to be a vast difference between animate and inanimate matter not foreseen by extant three-dimensional chemistry. There is more to life than the chemical reduction. I urge you to find the truth, and I shall be grateful for your efforts my brothers and sisters.

I do not wish to perish, but you must know that if I do perish, that Four-Sphere Theory is a gift of Heaven, and I, Zulfikar Moinuddin Ahmed, Archangel of Heaven, shall leave you in charge for determining sharper understanding of life. My beloved people, the Human Race, will suffer without deeper understanding here.

In case you need further assistance, please contact my brothers and sisters in Finance. Madam Christine Lagarde at European Central Bank is a good lady, and she will help you. She will know others who will as well. Do not fail my beloved people, physicists. You were less than impressive in Manhattan Project. This will allow you to return to sanity.
